HTG UROGRAM

Automated measurement of urine output in the ICU to increase nurse efficiency and clinical data accuracy.

HTG Medical develops HTG Urogram, an innovative device for automatic measurement of urine output in ICU patients. The product eliminates manual measurement and data transcription, significantly reducing the administrative burden on nurses and increasing the accuracy and availability of real-time data. HTG Urogram is easily integrated into hospital systems, reducing errors and saving material costs. Our solution is tested directly in the healthcare setting and tailored to the needs of the staff.

Unique selling points:

- Automation of urine measurement increases efficiency and reduces the burden on medical staff.
- Accurate, real-time data for rapid clinical decision-making.
- Compatibility with standard urine bags reduces material costs.
- Easy integration with hospital systems (HL7 standard).
- Tested and verified in real medical conditions.
