# GALOCHROM

## Multimodal columns for chromatographic separations

Galochrom is the first Czech manufacturer of unique separation columns designed for the analysis and purification of any organic compounds. Our multimodal technology will enable accelerated innovation across many industries, from new drug development to large-scale chemical production. In addition to superior efficiency, a major benefit is the savings of up to 80% of the costs associated with running liquid chromatography.

## Unique Selling Points:

- Original Czech stationary phases for efficient chromatographic separations.
- Sustainable production using natural resources.
- Development of customized chromatographic methods according to customer needs.
