An app for discovering opportunities for automation and AI in companies

AI software platform for mapping, automation and monitoring
manual tasks performed on computers. The system securely records user interactions on computers, identifies manual processes using AI and proprietary algorithms, and recommends automation in popular platoforms.

Unique Selling Points:

- The most affordable business process identification solution on the market.
- Semi-automated process identification instead of consultants.
- Automatic identification of automation opportunities in tools such as n8n, Make and Zapier.
