WAULTER – AI GDPR ASSISTANT AND CONSENT SOLUTIONS

A modular AI platform with a portal for businesses and users, managing consent, documents and privacy in web and mobile applications.

AI DPO Assistant that automates GDPR obligations for businesses, reduces legal costs and manages consent, user rights and privacy. It audits the digital environment, assesses obligations and generates legal documents such as privacy notices and cookie notices at the attorney output level. It uses AI chat to gather insights from employees and connects legal, technical and operational perspectives. The result is a consent, preference center integrable into the business, and executed legal documents. Users gain clarity on consent settings and an understanding of why and how data sharing delivers value to them and the business.

Unique Selling Points:

- AI DPO assistant replacing manual legal and compliance processes.
- Automatic analysis of the digital environment and assessment of GDPR obligations.
- Attorney level of generated legal documents.
- A consent and preference centre connecting companies and users.
- Transparent and easy-to-understand management and privacy for end users.
