ZUNI

Digital Wound Care and Clinical Photography

ZUNI offers an innovative digital solution for managing photographic documentation of wounds, which significantly simplifies the daily work of healthcare professionals. The technology replaces time-consuming manual procedures with a modern mobile app that automates wound documentation and ensures the quality of the images taken. ZUNI saves doctors and nurses time by streamlining administrative tasks and ensuring the standardized documentation required for healthcare reimbursement. Through collaboration with leading university hospitals, the system delivers real-world value, helps refine treatment, and reduces the risk of complications for patients.

Unique Selling Points:

- A 50% increase in efficiency—automating administrative tasks and guiding the photo-taking process saves nurses half the time on each dressing change.
- Our own expert database—thousands of professionally annotated images from real-world cases, ensuring maximum accuracy and reliability in our analyses.
- Development based on real-world clinical practice.
