TOLGEE

A tool for perfect translation of texts and software.

Tolgee offers the ultimate solution for translating software such as web applications. The technology creates a simple and innovative tool that provides the highest quality translations using AI features. Tolgee saves software developers time by simplifying their repetitive localization tasks. Last but not least, the Tolgee open-source license is an important differentiating factor that brings many benefits to users. Developers from all over the world can work on the further development of the service and contribute to the further improvement of the platform.

Unique selling points:

- An open-source platform that provides innovative and fast software localization solutions.
- The service provides the highest quality translations using context and a custom AI translator.
- One of the fastest solutions on the market.
