NULLSPACES

A mixed reality platform that combines human capabilities with augmented reality, enabling industries to produce more efficiently.

The company specializes in computer vision, mixed reality and machine learning. The Digital Assistant (DA) product combines the benefits of human labour and state-of-the-art technology. The easy-to-install “plug & play” device with automatic calibration allows for high quality production or assembly while maintaining production line flexibility. An easy-to-use user interface minimizes time to production for new products and maximizes real-time efficiency.

Unique selling points:

- Reusability thanks to versatile, easy-to-install and relocatable equipment.
- It promotes productivity and profitability by eliminating long operator training.
- DA can provide motion data to support the standardisation of the production engineer.
- Employees don’t need tablets or glasses, so they can keep their hands free and concentrate on their work.
