SCOOLPT

A sculpture-architecture studio for 3D concrete printing focused on creating organic shapes resembling cellular structure.

The Scoolpt team offers fresh, creative building solutions in all contexts, from design through study, visualization and technical documentation to the actual implementation. With its comprehensive services, speed of execution, maximum precision, waste-free material efficiency and minimal labour requirements, Scoolpt is becoming a strong and promising competitor to conventional construction. Scoolpt technology enables the realization of a wide range of products, from small interior furnishings and outdoor furnishings to small buildings for public space to houses for living or working, including multi-storey houses.

Unique selling points:

- The combination of art and architecture brings fresh and creative solutions to every single project.
- It offers the entire complex solution from design and study through implementation to the actual realization of the project.
- A wide range of 3D printing options in different shapes and materials, including the possibility of various combinations.
