QEEDIO

Qeedio

A system for monitoring IT operations and critical threats that predicts, identifies and offers proven solutions in advance.

Qeedio focuses on detailed monitoring of digital services and prediction of threats to the corporate IT structure. It provides control over the functionality of key business processes, which prevents potentially serious problems in the operation of the company. The product is one of the AIOps services that minimize the workload of IT specialists and reduce the frequency and duration of IT system downtime as the volume of data from IT operations increases. Using AI methods, the service offers a high level of threat prediction with proactive, proven solutions thanks to an integrated knowledge base.

Unique selling points:

- Maximizing the quality of threat prediction using AI.
- The integrated knowledge base enables. quick solutions to known problems
- Reducing corporate costs and labour intensity.
- System accessibility and management from anywhere.
- Easy integration with existing IT systems.
