SKILLDEVELO

AI training platform for developing business and management skills through realistic video simulations.

The app allows you to build and run completely realistic and interactive video-conversations that simulate real-life scenarios, allowing you to practice your skills in a completely safe environment. The participant has to manage a conversation with a digital avatar whose reactions are generated in real time.
The service is primarily used to train business, managerial and general communication skills.
The platform uses advanced AI technology to simulate natural conversation incl. real-time video avatar generation and adapts to the user's skill level, providing a personalized and effective experience.

Unique selling points:

- Training experience thanks to fully audio-visual AI simulations.
- Long-term development through digital and experiential.
- Measuring results.
