FILUTA AI

FILUTA

An intelligent automation platform that enables the creation of composite AI solutions.

Filuta provides a SaaS platform for intelligent automation that has been designed from the ground up using Composite AI technology. The unique approach to self-learning and automatic synthesis of symbolic domains opens the door to new possibilities. In addition to creating automation solutions, the company also designs and manages their development throughout their lifecycle. Key features of the platform include speed of solution, the ability to learn from datasets, quantifiable results or a range of optimization carriers.

Unique selling points:

- Automation of real-world complex processes.
- Simplify development.
- Accelerating the operation and maintenance of automation services delivering intelligent solutions for a wide range of applications.
