LITERARY UNIVERSE

An all-in-one platform for creative writing and publishing.

The Literary Universe project offers an innovative platform for creating and publishing literary works that addresses the challenges in the traditional publishing industry and the rise of lower quality content on platforms such as Amazon and Wattpad. The aim of the platform is to integrate and simplify the whole process of writing, publishing and translation, removing middlemen and allowing authors to receive adequate financial remuneration. It focuses on complex literary universes and “endless stories” with loyal fan bases, as well as emerging specialized genres.

Unique selling points:

- Everything you need for creative work in one web app.
- Monetization opportunities for all authors who have a work, not just a select few.
- Each literary universe has its own encyclopedia where the author can put all the necessary information for the reader and link it to the stories.
