SCHOLARTECH

itScholar

A breakthrough method of teaching computer science, it contains theory, but above all practical exercises usable in practice, in a safe environment under the full control of the teacher.

An online platform that provides interactive demonstrations and exercises in a safe environment with full teacher control and management. It is designed to help students learn computer science in a modern and engaging way. It covers a wide range of topics from the basics of programming to more advanced concepts such as cyber security.

Unique selling points:

- We reflect the IT industry in the current i.e. modern form, our concept is modern, we do not focus only on algorithms and so-called. coding.
- Students will get a realistic idea of what information technology is all about.
- With us, students know what virtualization, networks, development environments, graphics, rendering, etc. are.
- Students will understand the meaningfulness of what they are learning.
- Our platform is comprehensive and unified, everything users need is in one place in one system, they don't have to jump between PDF, zip, URL link, Github, Wiki etc.
