PROLOGEE CZ

PROLOGEE CZ

Prologee is the first company to combine efficiency, ecology and ergonomics in logistics.

Prologee CZ is a company developing equipment that will allow manufacturing companies to use significantly lighter and cheaper packaging for packaging and transporting parts that are sensitive to damage. Special metal containers are often used for these parts, but they are heavy and expensive. Our solution is based on a special adapter that allows the use of lighter and cheaper packaging while maintaining the same ergonomics. The result is a substantial reduction in CO2 emissions during transport and lower packaging costs.

Unique selling points:

- Reduction of CO2 emissions during transport
- Saving packaging costs
- Improving work ergonomics
- Reducing space requirements for packaging in production
