PREAGON BIOTECH

Preagon Biotech

Globally unique selective and environmentally friendly insecticides.

Bedbug infestation is a worldwide problem that worsens the lives of millions of people. Bed bugs cause infections and allergies, reduce sleep quality and destroy lives and economies. Their eradication with traditional insecticides has negative environmental impacts and bed bugs are developing resistance. Preagon Biotech is very close to new compounds based on juvenile hormone research. These promising substances are effective, harmless and environmentally degradable. The goal is to bring them to market and revolutionize the fight against bed bugs. The company is also developing selective insecticides for agricultural pests and mosquitoes. The development is also supported by a sophisticated AI model.

Unique selling points:

- Selective insecticides.
- Ecologically degradable and environmentally friendly.
- Significant reduction in the time and cost of insecticide development.

Product
