INOTAP

Inotap brings greater efficiency and safety to beverage dispensing, removing process complexity and enabling data analysis of consumption and quality.

InoTap is focused on developing and commercializing innovative industrial design solutions to improve customer and user experience. Their product, the InoTap automated bumping device for draft beverages, combines advanced design, robotics, 3D printing and real-time data processing. This project brings greater efficiency and safety to the beverage dispensing process, removing process complexity and enabling data analysis of consumption and quality. It is led by experienced industrial design and technology experts. The goal is to complete the Minimum Viable Product, obtain patents and expand into the Czech and international markets.

Unique selling points:

- Automation of tapped beverage dispensing.
- Safe and fast operation.
- Data collection and interpretation for the operator and owner.
- Better quality final product.
