NOVAVITA

A materials laboratory dedicated to the development of new materials, mostly made from waste.

We believe in material reincarnation. Timeless design is at the heart of everything we do. Our mission is simple: to create playful and sustainable materials that help clean up the planet. That's why all of our products are made from waste or recycled materials. Each of our products is unique and custom made for the end user. Where others see waste, we see Novavita.

Unique selling points:

- With the changing ESG regulations, Novavita represents a new way to manage waste within individuals and large companies.
- At Novavita, we believe in a reverse design process, where everything starts with waste, and only on the basis of its properties do we invent and test what we could create from that waste.
- We create materials with a story.
