TALLWELL

TallWell

Use of AI for health assessment in veterinary medicine.

The solution offers a unique solution using AI elements to analyze and predict the health status of animals in veterinary clinics. Special sensor pads placed in the animals' pens allow non-contact monitoring of their vital signs. Special algorithms for real-time assessment of vital status help predict the evolution of health status and send information to a mobile app for veterinarians.

Unique selling points:

- Remote monitoring of animal vital signs.
- Using artificial intelligence for health prediction.
- Real-time health overview.
