OFFROADTRAILERS

Product

Modular trailer for efficient mobility logistics

Technology readiness

Development

▶ Proof of concept

Prototype

First implementation

Extensive implementation

OffRoadTrailers offers a new trailer design with a load capacity of up to 4.5 tonnes.

OffRoadTrailers are designed to achieve a higher effective payload (up to 50% compared to a trailer) with the same regulatory framework, thanks to the modular trailer design (compared to the more commonly used trailers in the EU) and the ability to overload a suitable towing vehicle.

Unique selling points:

- HIGHER LOADING CAPACITY – Carry up to 50% more cargo than conventional trailers.
- LONGER LOAD SPACE – Up to 40% more space for efficient logistics.
- EFFICIENT OPERATION – Smaller and electric towing vehicles can be used.
- WIDE USE – Replaces up to three vehicles and carries a variety of loads.
