EDMUND

Digital agent for technicians and maintenance workers.

Edmund offers cutting-edge solutions for technicians and maintenance in the industrial sectors. This digital agent provides comprehensive tools for analyzing different types of data, enabling companies to better understand production processes, optimize maintenance and increase overall efficiency. With advanced features and a simple user experience, companies can solve problems more efficiently, manage their technology better and make better strategic decisions.

Unique selling points:

- One of the first solutions on the market in the industry.
- Processing of various types of data describing production technology (PLC programs, electrical schematics, technical documents).
- Integrated Generative AI features.
