BRAINBEAMS

BRAIN BEAMS

Wearable neurostimulator to support concentration.

BrainBeams earBud is a miniature bean-shaped neurostimulation device that wears comfortably on the ear and supports the ability to concentrate with gentle electrical impulses. The unique hybrid electrode makes it easy to put on, comfortable to wear and will help stabilize attention for hours. BrainBeams earBud is available without a prescription and is ideal for anyone who needs to maintain high levels of concentration over the long term, overcome fatigue, or struggles with fluctuating attention. The product is created through a collaboration of neuroscientists, designers, military and psychiatric experts.

Unique selling points:

- Stimulation targeted to improve attention.
- Made for working professionals: discreet, mobile, unrestricted.
- Available without a prescription.
