PROMPTBOOK.STUDIO

Promptbook: an advanced library aimed at improving the handling of large language models (LLMs).

Promptbook brings a unique approach to developing applications using large language models (LLMs). It combines easy-to-read markdown notations with powerful tools for transformation, validation and execution of prompts. “Markdown” notation (book), is a new programming language that benefits programmers and ordinary users alike. It allows programmers to quickly create prompts and applications and to efficiently separate them from existing code, and it simplifies the work of ordinary users with its intuitive controls.

Unique selling points:

- Easily create pipelines and entire applications in a clear markdown format with the ability to visualize them with diagrams.
- Flexible integration of LLM, scripting tools and other modular components.
- Automated validation and transformation of pipelines into machine-readable format.
- Applications that are independent of any platform and highly portable.
